4. Schools and Libraries Support

Eligible schools, school districts, libraries, and consortia that include schools and libraries, may receive discounts for eligible telecommunications services, voicemail, Internet access, and internal connections under the schools and libraries universal service support mechanism. The discounts range from 20 percent to 90 percent. The level of the discount is based on the percentage of students in the school or school district that are eligible for the national school lunch program (or a federally-approved alternative mechanism), and location in a rural area. By Commission rule, the Schools and Libraries mechanism is capped at \$2.25 billion annually.¹

In order to receive discounts on eligible services, the Commission's rules require that the applicant submit to the Administrator a completed FCC Form 470, which sets forth the technological needs and the services for which the applicant seeks discounts. This submission initiates the required competitive bidding process. Generally, the FCC Forms 470 are posted on the USAC Schools and Libraries Division (SLD) website for at least 28 days so that providers have an opportunity to submit competing bids to perform the services.² After the eligible applicant has complied with the Commission's competitive bidding requirements and contracted for eligible services, it must file FCC Form 471 to request discounts for services that have been ordered.

The Administrator reviews the FCC Forms 471 that it receives and issues funding commitment decisions indicating discounts that the applicant may receive in accordance with the Commission's rules. Subsequently, the applicant either: (1) pays the after-discount portion of the service cost to the service provider, which, in turn, seeks payment from the Administrator for the discounted amount (using FCC Form 472), or (2) pays the entire bill (the pre-discounted amount) to the service provider, and seeks reimbursement from the Administrator for the discounted amount (using FCC Form 474). In the latter instance, the Administrator disburses the money to the service provider who, in turn, reimburses the applicant.

The Administrator acts on these requests in accordance with Commission rules and decisions. If the Administrator denies a request for funding, the applicant may either appeal directly to the Commission, or appeal to the Administrator. If rejected on appeal by the Administrator, the applicant may appeal to the Commission. Since inception, the program has experienced a tremendous expansion of both the number of applicants and recipients, and the number of appeals regarding decisions.

Frequently, the total amount of funding requested exceeds the \$2.25 billion cap. Under the Commission's rules of priority, when the filing window closes, the Administrator will calculate total requests for support submitted during that filing window. If total requests exceed total support

1 47 C.F.R. §54.507(a).

2 The posted forms can be viewed at www.sl.universalservice.org.

available in that funding year, SLD will: (1) calculate the requests for telecommunications services and Internet access for all discount categories (these services receive first priority for funding), (2) allocate the remaining funds to the requests for support for internal connections, beginning with the most disadvantaged schools and libraries (those eligible for a 90 percent discount), and (3) commit remaining funds for internal connections to the applicants at each descending discount level until there are no funds remaining (i.e. 89%, 88%, etc).

If the remaining funds are not sufficient to support all of the eligible discount requests within a particular discount level, the Administrator will divide the total amount of remaining support available by the amount of support requested within that discount level to produce a pro-rata factor. That is, each of the schools and libraries within that discount level will receive the same proportion of the support they requested.

In 2002, the Commission concluded that, beginning with the second quarter of 2003, any unused funds from the schools and libraries support mechanism would, consistent with the public interest, be carried forward for disbursement in subsequent funding years.³ The Commission determined that the Administrator shall report to the Commission, on a quarterly basis, funding that is unused from prior years of the schools and libraries support mechanism. On an annual basis, in the second quarter of each calendar year, all funds that are collected and that are unused from prior years shall be available for use in the next full funding year in accordance with the public interest and notwithstanding the annual cap. In the *Schools and Libraries Third Report and Order and Second Further Notice of Proposed Rulemaking*, the Commission directed USAC to carry forward \$420 million of unused prior year funds to increase the amount of funds available for pending Funding Year 2003 requests.⁴

3 See *Schools and Libraries Universal Service Support Mechanism*, CC Docket No. 02-6, 17 FCC Rcd 11521 (2002) (*Schools and Libraries Order*), para. 3. In the *Schools and Libraries Order*, the Commission decided that it was in the public interest to take immediate action to stabilize the contribution factor while the Commission considered whether and how to reform the way in which contributions to the universal service mechanism were assessed. The Commission determined that unused funds periodically would be applied to reduce the contribution factors.

4 See *Schools and Libraries Universal Service Support Mechanism*, CC Docket No. 02-6, 18 FCC Rcd 26912 (2003) (*Schools and Libraries Third Report and Order and Second Further Notice of Proposed Rulemaking*), para 52.

As of May 6, 2004, USAC had committed \$2.2 billion and disbursed over \$1.6 billion of Funding Year 2001 funds.⁵ USAC had also committed nearly \$2.2 billion, and disbursed over \$1.3 billion of Funding Year 2002 funds.⁶ As of the same date, USAC had committed over \$2.5 billion, and disbursed over \$324 million of Funding Year 2003 funds.⁷

For Funding Year 2004, USAC reviewed 39,785 applications and estimates that requests total nearly \$4.3 billion. USAC estimates that \$1.6 billion Priority One funds (telecommunications services and Internet access) have been requested. It also estimates that Priority Two requests falling within the 90 percent discount level total \$1.3 billion.

USAC supplies the Commission with funding commitments and disbursements information for the Schools and Libraries mechanism for all active funding years. USAC provided the Commission with data as of May 6, 2004. Table 4.1 summarizes commitments and disbursements by applicant type and by service type for each funding year. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Thus, disbursements for the two most recent funding years will rise substantially.

5 USAC reports that for Funding Year 2001 (July 1, 2001 – June 30, 2002), only eight applications remained in the program integrity assurance process. Universal Service Administrative Company, *Federal Universal Service Support Mechanisms Fund Size Projections for the Third Quarter 2004*, at 24. See Tables 4.2 and 4.3 for details.

6 USAC reports that for Funding Year 2002 (July 1, 2002 – June 30, 2003), only 194 applications remained in the program integrity assurance process. Universal Service Administrative Company, *Federal Universal Service Support Mechanisms Fund Size Projections for the Third Quarter 2004*, at 25. See Tables 4.2 and 4.3 for details.

7 USAC reports that for Funding Year 2003 (July 1, 2003 – June 30, 2004), 37,402 applications had received at least one funding commitment decision letter, and 2,421 remained in the program integrity assurance process. Universal Service Administrative Company, *Federal Universal Service Support Mechanisms Fund Size Projections for the Third Quarter 2004*, at 26. See Tables 4.2 and 4.3 for details.

Table 4.2 summarizes commitments and disbursements by state and by type of applicant for Funding Years 2001, 2002 and 2003. Table 4.3 is based on the same data as Table 4.2 and shows, on a state-by-state basis, funding commitments and disbursements for the three major types of services: internal connections, Internet access, and telecommunications. The lists of individual funding commitments and disbursements are too lengthy to include in this report, but are available online from USAC's website.⁸ Information for earlier Funding Years can be found in earlier editions of the *Universal Service Monitoring Report*.

Table 4.4 summarizes, for Funding Years 2001 through 2003, fund disbursements by type of service provider entity that provides the underlying service to the school or library, and by the way USAC was billed (whether from the school/library using FCC Form 472, or by the service provider directly using FCC Form 474).⁹ Unlike the other tables in this section, this table is based on information in USAC's *Federal Universal Service Support Mechanism Fund Size Projections for the Third Quarter 2004*, and reflects disbursements as of March 31, 2004.

Table 4.5 shows, for Funding Years 2001 and 2002, commitments and disbursements on a per-student basis. Although both public and private schools are eligible for Schools and Libraries support, only public school enrollment data were available on a state-by-state basis from the Department of Education, so the amounts per student may be slightly inflated. Unused funding commitments have been used to offset collections for later years.

Tables 4.6 and 4.7 show, on an aggregated national level, commitments and disbursements per student for each category of eligible service: 1) internal connections, 2) Internet access, 3) telecommunications, and 4) total funding, for Funding Years 2001 through 2003. The figures for Funding Year 2003, particularly disbursements, should be viewed as preliminary and likely subject to adjustment in the future.

8 See www.sl.universalservice.org/funding/OpenDataSearch/.

9 In both cases, the service provider receives the money. Where the applicant paid the entire bill up front, the service provider then reimburses the applicant.

Source. Raw data provided by the Universal Service Administrative Company, rollups performed by Industry Analysis and Technology Division, Wireline Competition Bureau, FCC. Activity through May 6, 2004. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.

Source: Raw data provided by the Universal Service Administrative Company, rollups performed by Industry Analysis and Technology Division, Wireline Competition Bureau, FCC. Activity through May 6, 2004. Because of the appeals process, funding commitments and disbursements can be made after the end of the program year. Also, disbursements may continue beyond the end of the program year in the event of delayed internal connections installation. Other adjustments and corrections may also be made.

Table 4.3

Disbursements per Student

5. Rural Health Care Support

The portion of the 1996 Telecommunications Act that covers universal service support for rural health care providers states that “[a] telecommunications carrier shall . . . provide telecommunications services . . . to any public or non-profit health care provider . . . at rates that are reasonably comparable to rates charged for similar services in urban areas in that state.”¹ The Commission’s universal service rules permit eligible health care providers² to receive support for any telecommunications service.³

In 2003, the FCC adopted an order that significantly changed the universal service support mechanism for rural health care providers starting in Funding Year 2004 (July 1, 2004 – June 30, 2005). The Commission concluded that dedicated emergency departments of rural for-profit hospitals that participate in Medicare should be deemed “public” health care providers eligible to receive prorated rural health care support.⁴ Further, the Commission expanded the Internet access for which rural health providers can receive support to any form of Internet access reasonably related to the health care needs of the facility.⁵ The Commission also created “safe harbor” categories that allow rural health care providers to compare the urban and rural rates for functionally similar services as viewed from the perspective of the end user.⁶ Also, rural health care providers can now compare rural rates to urban rates in any city with a population of at least 50,000 in the state, as opposed to the nearest city with a population of 50,000.⁷ The

2 47 C.F.R. § 54.601.

3 A 1.544 Mbps (T1) maximum bandwidth cap was employed in Funding Years 1 and 2. *See Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, 12 FCC Rcd 8776, 8952-94 (1997). The Commission removed the bandwidth cap for year three and beyond. *See Federal-State Joint Board on Universal Service*, CC Docket Nos. 97-21 and 96-45, Sixth Order on Reconsideration in CC Docket No. 97-21, Fifteenth Order on Reconsideration in CC Docket No. 96-45, 14 FCC Rcd 18756 (1999) (*Fifteenth Order on Reconsideration*).

4 *See Rural Health Care Support Mechanism*, WC Docket No. 02-60, Report and Order, Order on Reconsideration and Further Notice of Proposed Rulemaking, 18 FCC Rcd 24546 (2003) (*Rural Health Care Order*) at 13.

5 *See Rural Health Care Order* at 22.

6 *See Rural Health Care Order* at 33.

7 *See Rural Health Care Order* at 37.

Commission's Order also allows rural health care providers to receive discounts for satellite services even where alternative terrestrial-based services may be available.⁸

USAC recently streamlined the application process for the Rural Health Care mechanism. USAC combined the information from two forms onto one,⁹ allowed the new form to be filled out electronically, and, where possible, prefilled the form with that applicant's information.¹⁰ The process is as follows. To apply for funding, an eligible rural health care provider must first submit FCC Form 465 (description of services requested and certification form) to the Rural Health Care Division (RHCD).¹¹ If the RHCD determines that the health care provider is eligible, it posts the Form 465 on its website.¹² After 28 days from posting, the rural health care provider may contract with the most cost-effective bidder. The health care provider then fills out FCC Form 466 (funding request and certification form), and submits it to the RHCD. Upon receipt and approval of FCC Form 466, the RHCD sends a Funding Commitment Letter to the rural health care provider that notifies it of the preliminary approval of the request for support, and provides an estimate of the amount of support that can be expected. The rural health care provider must respond by submitting FCC Form 467 (receipt of service confirmation form) to verify that the service has begun. RHCD then sends a Support Schedule to the carrier and the health care provider. The carrier provides support to the rural health care provider, then invoices the RHCD for the support, and upon approval, USAC reimburses the carrier.

By rule, the Commission established a \$400 million per funding year cap for the rural health care mechanism.¹³ For more information on the Universal Service Program for Rural Health Care providers, visit the RHCD website.¹⁴

8 See *Rural Health Care Order* at 44.

9 FCC Forms 466 and 468 were combined into the new FCC form 466.

10 See <http://www.rhc.universalservice.org/whatsnew/062003.asp#2>

11 The Rural Health Care Corporation merged into the Universal Service Administrative and became the Rural Health Care Division on January 1, 1999. See *Changes to the Board of Directors of the National Exchange Carrier Association, Inc., Federal-State Joint Board on Universal Service*, CC Docket Nos. 97-21 and 96-45, Third Report and Order in CC Docket No. 97-21 and Fourth Order on Reconsideration in CC Docket No. 97-21 and Eighth Order on Reconsideration in CC Docket No. 96-45, 13 FCC Rcd 25058, 25064-65, para. 12 (1998).

14 See www.rhc.universalservice.org.

USAC supplied the Commission with funding commitments and disbursements information as of June 14, 2004. Table 5.1 summarizes funding disbursements for all funding years by service speed. Tables 5.2 through 5.4 show details for Funding Years 2001 through 2003. For details on the preceding funding years, see the previous editions of the *Monitoring Report*.¹⁵

Funding Year 2001 began on July 1, 2001, and ran through June 30, 2002. All activity for Funding Year 2001 is complete.¹⁶ Final figures show that \$19.7 million was committed, and \$18.6 million was disbursed.¹⁷

Funding Year 2002 began on July 1, 2002, and ran through June 30, 2003. USAC reports that it received 2,779 Form 466/468 packets.¹⁸ Of those, 86 were denied, 103 were withdrawn by the applicant, and 6 were incomplete or require clarification. As of June 14, 2004, \$23.3 million had been committed, and \$19.2 million had been disbursed.¹⁹

Funding Year 2003 began on July 1, 2003, and ran through June 30, 2004. USAC reports that it received 2,515 Forms 465 and 1,523 Form 466 packets. Of those 1,523 packets, 883 have been completely processed, 136 are awaiting supervisory approval, 134 are complete and ready to process, 37 have been withdrawn, 2 have been denied, and 331 are incomplete or require clarification.²⁰ As of June 14, 2004, \$15.3 million had been committed, and \$2.1 million had been disbursed.²¹

Table 5.2 summarizes funding commitments and disbursements on a state-by-state basis for Funding Years 2001, 2002 and 2003. Table 5.3 shows state-by-state disbursements by service speed for the same period. In some instances, the service speed was not clearly identifiable, such as

15 *Universal Service Monitoring Report*, CC Docket No. 98-202, November 6, 2001, October 9, 2002, and December 22, 2003.

16 Universal Service Administrative Company, *Federal Universal Service Support Mechanisms Fund Size Projections for the Third Quarter 2004*, at 17.

17 See Table 5.2.

18 Universal Service Administrative Company, *Federal Universal Service Support Mechanisms Fund Size Projections for the Third Quarter 2004*, at 18.

19 See Table 5.2.

20 Universal Service Administrative Company, *Federal Universal Service Support Mechanisms Fund Size Projections for the Third Quarter 2004*, at 19.

21 See Table 5.2.

with frame relay service. Where possible, the most likely speed for that service was chosen. For example, Frame Relay theoretically could be provided at voice grade speeds, but the vast majority of it is provided at broadband speeds (200K to 1.49Mb), so Frame Relay was assumed to be broadband at that level.

Table 5.4 shows, for Funding Years 2001 and 2002, on a state-by-state basis, disbursements from the Rural Health Care Support Mechanism, the population of the rural areas, and the disbursements per person in rural areas.

Table 5.1
Rural Health Care Funding Disbursements by Funding Year

Funding Year	Voice Grade	Broadband		Other Service or Speed Unknown	Total
	56K to 199K	200K to 1.49Mb	1.5Mb and faster		
1998	\$202,778	\$880,375	\$2,292,252	\$0	\$3,375,405
1999	452,992	1,040,529	2,719,619	91,419	4,304,559
2000	613,595	2,927,805	6,685,573	87,198	10,314,172
2001	319,539	8,110,537	10,124,171	0	18,554,248
2002	418,378	9,153,747	9,625,988	0	19,198,112
2003	14,939	753,017	1,318,786	1,315	2,088,057

Note: Disbursements through June 14, 2004. Because of the appeals process, funding commitments and disbursements may be made after the program year ended.

6. Subscribership and Penetration

The number and percentage of households that have telephone service represent the most fundamental measures of the extent of universal service. Continuing analysis of telephone penetration statistics allows us to examine the aggregate effects of Commission actions on households' decisions to maintain, acquire or drop telephone service. This section presents comprehensive data on telephone penetration statistics collected by the Bureau of the Census under contract with the Federal Communications Commission.¹ Along with telephone penetration statistics for the United States and each of the states from November 1983 to March 2004, data are provided on penetration based on various demographic characteristics. This section also updates information on telephone penetration by income by state.² This information is designed to help evaluate the degree of success of making telephone service available to low-income households in each state.

The most widely used measure of telephone subscribership is the percentage of households with telephone service, sometimes called a measure of telephone penetration. Prior to the 1980s, precise measurements of telephone subscribership received little attention. Traditionally, telephone penetration was measured by dividing the number of residential telephone lines by the number of households. Measures of penetration based on the number of residential lines, however, became subject to a large margin of error as more and more households added second telephone lines and more consumers acquired second homes. By 1980, the traditional measure of penetration (residential lines divided by the number of households) reached 96%, while the number of households reporting that they had telephones in the 1980 census was 92.9%.

Recognizing the need for more precise periodic measurements of subscribership, the Commission requested that the Census Bureau include questions on telephone availability as part of its Current Population Survey (CPS), which monitors demographic trends between the decennial censuses. This survey is a staggered panel survey in which the people residing at particular addresses are included in the survey for four consecutive months in one year and the same four months in the following year. Use of the CPS has several advantages: it is conducted every month by an independent and expert agency; the sample is large; and the questions are consistent. Thus, changes in the results can be compared over time with a reasonable degree of confidence.

1 This information was included in Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Telephone Subscribership in the United States* (August 13, 2004). That report is updated three times a year.

2 This information was included in Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Telephone Penetration by Income by State* (Feb. 26, 2004). That report contains information on the number of households in each state as well as the percentages reported here.

Unfortunately, the results of the CPS cannot be directly compared with the penetration figures contained in the 1980, 1990, and 2000 decennial censuses. This is due to differences in sampling techniques and survey methodologies, and because of differences in the context in which the questions were asked. For example, the 2000 decennial census reported 97.6% of all occupied housing units in the United States had telephone service available, whereas the CPS data showed a penetration rate of 94.6% of households for March 2000. This difference is statistically significant and appears to indicate that the CPS value may be on the low side and the decennial census value may be on the high side, with the most probable value lying somewhere in between.

The decennial census data have the advantage of using much larger samples than the CPS because they are based on a sample of one-in-six households that filled out the Census Bureau's long form. This makes it possible to look at long-run trends for small minority groups. For example, statistics from the 2000 census estimated that 67.9% of all American Indian households living on federally recognized reservations and trust lands had telephone service, as compared with 46.6% estimated from the 1990 census.³

The specific questions asked in the CPS are: "Is there a telephone in this house/apartment?"⁴ And, if the answer to the first question is "no," this is followed up with, "Is there a telephone elsewhere on which people in this household can be called?" If the answer to the first question is "yes," the household is counted as having a telephone "in unit." If the answer to either the first or second question is "yes," the household is counted as having a telephone "available." The "in unit" data and the "available" data are reported in Tables 6.6 through 6.10 and 6.12 through 6.16, and Charts 6.1 and 6.8. All of the remaining tables and charts of this section just report the "in unit" data.

Although the survey is conducted every month, not all questions are asked every month. The telephone questions are asked once every four months: in the month that a household is first

3 For more information, see the report Industry Analysis and Technology Division, Wireline Competition Bureau, Federal Communications Commission, *Telephone Subscribership on American Indian Reservations and Off-Reservation Trust Lands* (May 5, 2003).

4 The questions are intended to be neutral as to whether the household has wireline or wireless phones. For the November 2001 survey, households were also asked which type(s) of phones they had. While the response rate was not sufficient for a complete reporting of the results of this new question, 1.2% of the households indicated that they had only wireless phones. 5.9% of the households failed to answer this question. The CPS no longer asks this follow-up question on a regular basis. However, a similar question was again asked in February 2004 for a special supplement given to a portion of the sample. In that month, 4.9% of those completing the supplement indicated that they had only wireless phones. 12.5% of the households failed to complete the supplement, and when imputed responses of those households are included, the estimate of households with only wireless goes up to 6.0%.
